DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(c), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(c) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/27/2008 has been entered.

Allowable Subject Matter

2. Claims 11-15 are allowed.
3. The following is an examiner's statement of reasons for allowance: The closest prior art is Tomzig (US 6,001,170) and Linares (US 3,899,304). Tomzig et al teaches a graphite crucible, a seed crystal, a heater and a magnetic system. Linares et al teaches an electrode may be inserted into a melted and is electrically connected as an anode, and a molten support material is connected as a cathode, where the flow of the current would be vertical. Tomzig and Linares does not teach, suggest or provide any rationale for a means for applying a voltage across the electrodes to generate a radial electric current in the melt and a means to stir the melt by applying voltage to the coil to impose magnetic field lines in the melt such that the flow of radial electric current crosses the magnetic field lines to impart a stirring force to the melt.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
